

## AUTOMATIC EXTRACTOR OUTLET TYPE HFA

The automatic extractor outlet type HFA is designed to provide economy in energy consumption for central extractor systems while at the same time giving a high level of comfort for users.

- Depending on the type of building, heating energy as compared with total consumption can be reduced by 10-30%.
- The heating system can be designed to smaller dimensions.
- The HFA extractor outlet is suitable for all buildings with central extractor systems.
