

DISPLACEMENT FLOW DIFFUSERS

TROX HESCO displacement flow diffusers offer a variety of different shapes and guarantee an optimum compliance with all kinds of architectural demands. Depending on the customers' requirements, bespoke designs supplement the large range of standard versions.

The displacement flow diffusers provide optimum comfort conditions combined with excellent acoustics and a uniform velocity profile over the entire outlet.

Special geometrically arranged plastic nozzles with integral air deflectors scoops guarantee that no maintenance is required.

Simple and quick selection and design of displacement flow diffusers is possible with the TROX design program "Easy Product Finder".
