A magnificent historical building on Lake Lucerne with the most up-to-date technical comfort features.

BRIEF DESCRIPTION

The Parkhotel, which opened in 1903, was originally designed by the architect Karl Gottlieb Koller from Ragaz. It is located on the bank of Lake Lucerne, not far from the legendary Rütli. Guests of the Parkhotel include artists and actors from Switzerland and abroad, as well as personalities from business and industry. From 2009, the entire Parkhotel was converted to a hotel in brand new condition with three theme worlds, Wine & Dine, Art & Culture and Health & Wealth, and was fitted out with the most up-to-date technical comfort features.

TROX HESCO SCHWEIZ AG SOLUTION

TROX HESCO Schweiz AG worked supportively in conjunction with planners and architects in the planning, development and preparation stages. Special corner pieces were used as dummies. During the design phase, the installer was assisted by TROX HESCO Schweiz AG. The displacement flow diffuser continuous floor bands serve to ventilate the garden restaurant with its view of the lake.
